9. City Manager's Report

B. Status Update/Reports

6. Status Report on Sandy Bay Highlands Conservation Subdivision, Phase 3

- Preliminary Plat has been approved by City Council in December 2023.
- McMahon has submitted applications to Wisconsin Department of Natural Resources (WDNR) and US Army Corp of Engineers (USACOE) for permission to fill wetlands.
- WDNR's initial response is that they believe that the development can avoid wetlands and is awaiting further alternative analysis.
- USACOE's initial verbal response is that they have no jurisdiction of these wetlands (not connected) and has sent a preliminary review to EPA for their concurrence.
- McMahon is stating that with USACOE's lack of jurisdiction will put these wetlands into a different category of coverage by WDNR which should allow us to fill up to 10,000 SF of wetlands. The wetlands that are proposed to be filled are within the proposed cul-de-sac.
- Anticipating receiving wetland permit information in the middle of February.
- City Engineering Staff along with McMahon are continuing with the infrastructure (sewer, water, roadway) and stormwater design and plans.
